

KLAFS
MY SAUNA AND SPA

ATMOSPHERE
BY KLAFS

WE CREATE
ATMOSPHERE

Dive into the wonderful world of Atmosphere. You don't have a spa area with a clear view of the majestic Alps, the desert, or the breaking waves of the sea?

With Atmosphere you can offer your guests an impressive, relaxing experience of nature in brilliant picture quality, and that for example right in the middle of the city.

BRINGING NATURE INTO THE ROOM

With Atmosphere, KLAFS opens a window to living nature in your sauna. With the aid of breathtaking Atmosphere films of first-class artistic and technical quality, played on brilliant, integrated screens, your sauna or rest area is transformed into a sensual experience of nature. Nature becomes a part of the room.

Unspoiled nature and authentic original sounds in spectacular harmony promote the viewer's relaxation and well-being while at the sauna. The films act as wonderful encounters with the both tender and spectacular natural world. They create a feeling of comfort and well-being – making them suitable for every mood.

The Atmosphere nature films stimulate the viewer's endorphins and trigger relaxation responses similar to comparable experiences found in the real natural world. This process is called cognitive memory.

More than one hundred of these amazing works are already available for you and your guests' relaxation experiences, and we are continuously adding new films as well.

Our full service package includes delivery, set-up and installation of all hardware and software, so you won't have anything to worry about.

01 Transitions become fluid. The daily routine loses its significance. In the here and now, but also at a completely different place. Tuning out of your hectic daily routine.

02 Whether you choose UHD single screen, 4K/UHD multiscreen or an individual screen solution customized to your project: the specially glazed monitors are qualified for continuous use in sauna conditions and can perfectly reproduce the brilliant quality of the films. Intricately constructed frames allow several monitors to be combined to present one continuous image.

IMPRESSIVE NATURE FILMS

The Atmosphere films are produced using a special Slow Movement processing method with a very high picture quality utilizing 8K technology and mastered in UHD format. Slow Movement creates an extremely powerful effect of deceleration in the viewer. Waterfalls, crashing ocean waves or grass blowing in the wind appear in complete harmony and calm with an impressive profound effect.

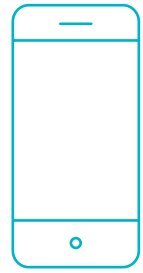

NATURE IS ESSENTIAL FOR
OUR WELL-BEING, OUR
HEALTH AND IMPORTANT
FOR OUR PRODUCTIVITY.
BIOPHILIA DESCRIBES THE
STRONG GENETIC CON-
NECTION OF HUMANS
TO NATURE
AND ALL
LIVING
THINGS.

BIO- PHILIA

Erich Fromm (psychoanalyst, philosopher), 1964
