

ICE FOUNTAIN POLARIS.

Ice fountain POLARIS, here integrated in on-site wall, faced with black lacquered glass.

POLARIS.

INSPIRED BY NATURE.

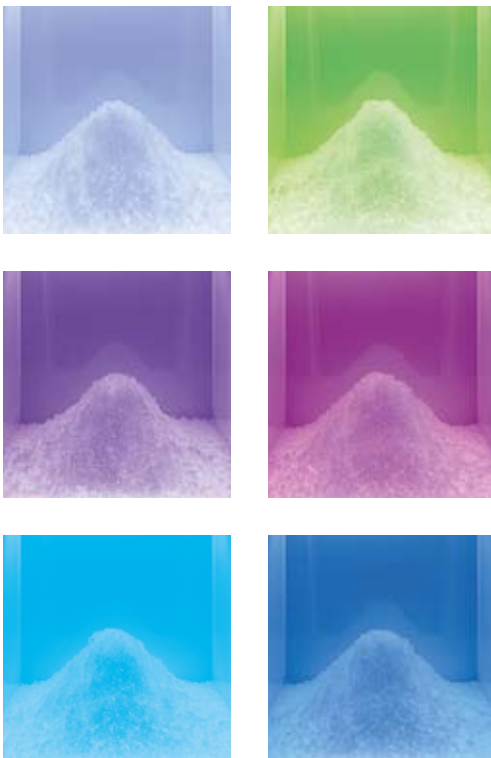

INDISPENSABLE FOR YOUR SPA.

ICE FOUNTAIN POLARIS: EFFECTIVE COOLING, COOLLY PRESENTED.

After a sauna or steam room session cooling off is not just vital, it also bestows your wellness guests with a special prickling freshness kick. The hot phase in a sauna or steam room has a relaxing and cleansing effect, it stimulates circulation and the immune system. The subsequent cooling-off phase has key significance: blood vessels extended by the heat now rapidly contract. The interplay between heat and cold serves as a blood-vessel workout and also furthers the removal of waste products.

Cooling with ice gives rise to a tingling cooling feeling: euphoric and mood boosting simultaneously. Delight your guests with the ice fountain POLARIS as a natural highlight and extension of conventional cooling methods. The high-performance ice flake maker produces soft ice. Fluffy ice flakes have a healthful side effect: they finely peel the skin.

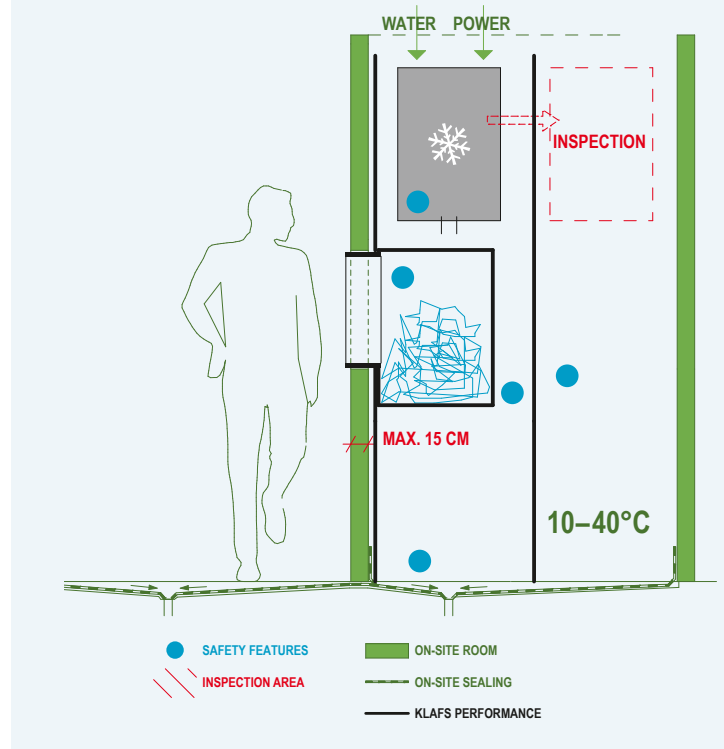

The ice fountain offers you as operator many benefits: thanks to its innovative construction and modular configuration it can be installed virtually anywhere in your spa environment. Its safety system and simple controls allow trouble-free operation behind the scenes. All this with a good price-performance ratio. With an optional colour alternator the ice fountain adds sparkling brilliancy to the ice crystals. The cooling section of your spa becomes a captivating eye-catcher.

The special LED-RGB colour alternator bathes the ice in the colours of the natural phenomenon aurora borealis. The ice fountain POLARIS is the enthralling focal point of your spa environment.

BENEFITS

- The cool design creates a special highlight in the cooling of your spa
- Robust and low maintenance
- Easy to clean
